

	Course Name:	English Language	Course Code:	SS1005
	Program:	Electrical Engineering	Semester:	Fall 2023
	Duration:	3 Hours	Total Marks:	100
	Exam Date:	18th December 2023	Weight:	50
	Section:	All	Page(s):	4
	Exam Type:	Final Exam	CLO #	1-5

Student Name: _____ Roll No. _____ Section: _____

- Instructions:
1. Do not forget to write your Name and Roll Number.
 2. Transfer all answers on the answer sheet.

Question No.1

(CLO No. 1) Marks: 20

(a). Evaluate the below given extracts and answer questions given at the end of each text.

Text A

Calculus is a branch of mathematics that focuses on the study of continuous change and motion. At its most basic level, Calculus comprises two primary concepts: differentiation and integration. Differentiation involves finding the rate at which a quantity changes, often represented by the derivative of a function. For instance, if one considers the position of a moving object over time, the derivative of its position function yields the object's instantaneous velocity. On the other hand, integration deals with the accumulation of quantities and the calculation of the total change over an interval. For example, integrating the velocity function of the aforementioned object provides the total distance traveled. These fundamental principles of calculus offer a powerful mathematical framework for analyzing and understanding dynamic processes in various fields, demonstrating its widespread applicability and significance in describing real-world phenomena.

- Based on your understanding of the above passage, **formulate** a suitable topic to this paragraph. [1]
- Differentiate** if the main idea is stated or implied in the above passage. In case the main idea is stated, **rewrite** it on the answer sheet; however, in case the main idea is implied, **compose** a complete sentence which can serve as the main idea for this passage. [2]
- Predict** the author's purpose in the above passage with reference to the evidences from the passage. [2]
- Choose TWO** clearly stated **minor supporting details** from the above passage. [2]
- Explain** the tone of the paragraph and justify its evidence from the passage. [3]

Text B

Once upon a time, in the realm of engineering, there lived a dedicated engineer named Bilal. One day, he was assigned a task to measure the height of a flagpole using a measuring tape. As diligent as ever, Bilal carefully measured the shadow of the pole and then the angle of elevation to the top, employing his engineering skills to derive a precise calculation. Proudly, he presented his results to the supervisor, who glanced at the numbers and then pointed to the tape measure still dangling from the pole. "But Bilal," the supervisor chuckled, "why didn't you just use the tape measure to get the height?" Bilal, slightly

embarrassed, replied with a smile, "Well, that would have been too easy, wouldn't it? Where's the challenge in that?"

- i. Based on your understanding of the above passage, **formulate** a suitable topic to this paragraph. [1]
- ii. **Differentiate** if the main idea is stated or implied in the above passage. In case the main idea is stated, **rewrite** it on the answer sheet; however, in case the main idea is implied, **compose** a complete sentence which can serve as the main idea for this passage. [2]
- iii. **Predict** the author's purpose in the above passage with reference to the evidences from the passage. [2]
- iv. **Choose TWO** clearly stated major supporting details from the above passage. [2]
- v. **Explain** the tone of the paragraph and justify its evidence from the passage. [3]

Question No.2

(CLO No. 2) Marks: 15

- (a). **Evaluate** type of irony and justify your identification in Text A and B. [1+1.5+1+1.5]

Text A

As the renowned chef prepared to unveil his latest culinary masterpiece in the grand opening of his upscale restaurant. The dish, meticulously crafted and infused with exotic ingredients, was intended to be a celebration of innovation and gastronomic brilliance. However, as the first patrons eagerly took their bites, their expressions shifted from anticipation to disappointment.

Text B

In the dimly lit theater, the audience collectively held its breath as the protagonist confidently made decisions, unaware of the impending twists that awaited him. The audience, privy to a crucial secret or impending disaster, became silent co-conspirators in the unfolding story. Every unsuspecting step the protagonist took, every choice he made in blissful ignorance, heightened the tension.

- (b). **Differentiate** the dominant pattern of organization and **justify** your identification in text A and B given below: [1+1.5+1+1.5]

Text A

Exposure to smog, a noxious blend of pollutants often found in densely populated urban areas, can have significant and detrimental effects on human health. The intricate mixture of particulate matter, ground-level ozone, sulfur dioxide, and nitrogen oxides found in smog can irritate the respiratory system, leading to an increase in respiratory problems such as asthma and bronchitis. Prolonged exposure may contribute to the development or exacerbation of chronic respiratory conditions. Additionally, smog is associated with cardiovascular issues, as the pollutants can enter the bloodstream and affect the heart and blood vessels. Vulnerable populations, such as children, the elderly, and individuals with pre-existing health conditions, are particularly at risk. Long-term exposure to smog has also been linked to decreased lung function and an increased risk of premature death. Efforts to reduce smog levels through air quality regulations and sustainable urban planning are crucial to mitigating these adverse health effects.

Text B

Effectively dividing a professional's day into three slots requires a strategic approach to maximize productivity and maintain a healthy work-life balance. In the morning, focus on high-priority tasks that demand peak cognitive performance, such as critical decision-making and strategic planning. This time is

ideal for meetings and collaboration, leveraging the inherent freshness and mental acuity of the early hours. The afternoon is well-suited for administrative work, responding to emails, and engaging in routine tasks that don't demand as much cognitive effort. Consider dedicating a portion of the afternoon to creative endeavors or skill development, harnessing any remaining mental energy. In the evening, shift focus to follow-up communication, networking, and social activities that contribute to professional growth. Ensure to reserve the last part of the day for reflection, planning for the next day, and setting priorities. Remember, flexibility is crucial, and it's essential to adapt this framework based on specific job requirements, personal preferences, and unforeseen circumstances. Regular breaks and mindful transitions contribute to sustained productivity and well-being throughout the day.

(c). Differentiate the style and justify your identification in text A and B given below: [1+1.5+1+1.5]

Text A

I am pleased to inform you that your recent efforts and dedication have been recognized, and I am delighted to share the news that you have been selected for Employee of the Month Award. Your hard work and commitment have not gone unnoticed, and this recognition is well-deserved.

This achievement reflects your exceptional skills and contributions to research in Artificial Intelligence, and it is a testament to your unwavering commitment to excellence. Your positive impact on our team and organization is truly commendable.

On behalf of the entire team, I extend my heartfelt congratulations to you. We appreciate your continued dedication and look forward to witnessing your continued success in the future.

Text B

Guess what? You totally nailed it! Your awesome work hasn't gone unnoticed, and you've been chosen for monthly award. How cool is that? Your dedication and hard work have paid off big time.

Seriously, your skills and contributions to your work are next level. You're a rockstar, and this recognition is well-deserved. The whole team is buzzing with excitement for you.

Congratulations! You make us proud, and we can't wait to see what amazing things you'll do next.

Question No.3

(CLO No. 3) Marks: 15

- (a). **Propose** 3 more levels of narrowed down topics for "Humankind". Each narrowed topic should neither be a single word nor a full clause, but it should be an interesting topic for the reader. Moreover, each narrowed down topic must be narrower than the previous level topic. (3)
- (b). **Support** a list of 8 points on the narrowed down topic in Question 3 (a). Use either noun or adjective phrases and avoid using single words or full sentences. (8)
- (c). **Compose** a well-structured, three-points thesis statement based on the narrowed down topic for a five-paragraph argumentative essay. You may pick thesis points from the above generated list. Your thesis statement **MUST** be a compact single sentence. (4)

- (a). Construct an expository essay ranging 350 – 400 words using an interesting fact as a reader's hook on the topic given below. The essay must reflect the following structure. (20)

- The fact should be interesting and having authentic reference.
- After stating the fact, there should be a couple of sentences leading to the thesis statement.
- The 3-point, single-sentence thesis statement must be underlined.
- The paragraphs must include transitional phrases, forward, and reverse hooks to show coherence.
- An effective concluding paragraph.

Topic: "Explain how the youth can play its role in nation building."

- (b). Construct an application of about 200 words to the Senior Manager Administration, Mr. Usama Zafar, requesting him to schedule a post final exam tour to some historical place. (15)

Question No.5

(CLO No. 5) Marks: 15

- (a). Evaluate the below given case on barriers of listening and construct comprehensive answers to the given questions. (2.5×4=10)

In a dynamic marketing agency, a team of professionals gathered for a critical project meeting to discuss the launch of a new advertising campaign for a high-profile client. The team was led by Numair, a seasoned project manager with a proven track record. However, during the meeting, various barriers to effective listening emerged, impacting the team's ability to collaborate and understand key project details. The meeting room was adjacent to a common area, and the noise from ongoing office renovations occasionally disrupted the proceedings. Hasna, a key team member, had recently received a personal email regarding a family emergency, causing her to be mentally preoccupied and unable to fully engage in the meeting. Ahmad, the creative lead, had strong opinions about the visual elements of the campaign. He assumed that the design team's ideas were the only ones worth considering, leading him to dismiss alternative perspectives shared during the meeting. The digital marketing specialist, Midhat, used industry-specific acronyms and terminology that were unfamiliar to some team members, leading to confusion and a lack of clarity on certain campaign strategies.

Questions:

1. What impact did distractions have on the team's ability to listen during the meeting?
2. How did Hasna's preoccupation affect her participation in the meeting, and what could be done to address this barrier?
3. In what ways did Ahmad's assumptions and biases hinder effective communication within the team?
4. How did the use of technical jargon by Midhat contribute to a barrier in communication, and what steps can be taken to overcome this challenge?

- (b). Explain five text guidelines for making an effective Power Point presentation. (1×5=5)
